

# Responsible Construction Requires Responsible Contractors

**When everyone acts responsibly, great things happen**

Responsible contracting begins with responsible contractors and a skilled, trained workforce.

Who brings them together? We do.

We're the Indiana, Illinois, Iowa Foundation for Fair Contracting. We bring Labor and Management together to assist public bodies and contractors with OSHA, contract compliance and other contracting matters, while striving to secure work for responsible contractors.

Together, we create a future of responsible contracting that benefits everyone, including taxpayers. Call or click today to learn how we can help to make your next construction project more responsible.
